SUMMARY

Computer Science undergraduate with hands-on experience building full-stack web applications using React, Next.js, and TypeScript. Comfortable across the stack from database design to UI implementation and automated testing, with a growing foundation in data structures, algorithms, and system design. Seeking a Software Engineering internship/new-grad role.

EDUCATION

University of the Punjab — Lahore, Pakistan
Bachelor of Science in Computer Science (Ongoing) — Expected Graduation: October 2027

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks (IPv4/IPv6, MAC), Compiler Construction, Software Engineering (Agile, Scrum, Kanban), Computer Organization & Assembly Language, Web Technologies (HTTP/HTTPS, REST, SOAP, JSON), Discrete Mathematics, Probability & Statistics, Calculus & Analytical Geometry, Multivariate Calculus

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript (ES6+), TypeScript, SQL

Frameworks & Libraries: React, Next.js, Tailwind CSS, HTML5/CSS3

APIs & Backend: RESTful API Integration, PostgreSQL (Supabase, Neon)

Testing & Quality: Automated Unit Testing (Vitest)

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming

Tools & Platforms: Git, GitHub, Vercel (CI/CD), Claude, ChatGPT, Cursor

Spoken Languages: English, Urdu, French (Beginner)

PROJECTS

Collaborative Document Editor | *Next.js, TypeScript, Supabase (Postgres), Vitest* | Live / GitHub

- Built a lightweight Google Docs-style app supporting document creation, rich-text editing, renaming, and deletion, with automatic duplicate-name resolution.
- Implemented file import (.txt/.md), a sharing/access-control model distinguishing owned vs. shared documents, and debounced autosave to PostgreSQL.
- Covered access-control and naming logic with automated unit tests (Vitest); deployed to production via Vercel with GitHub CI/CD.

Duolingo Clone — AI-Enhanced Language Learning App | *Next.js, TypeScript, PostgreSQL (Neon), AI API* | Live / GitHub

- Rebuilt Duolingo's core learning experience from scratch, including lesson progression, exercises, and gamified streak/XP tracking.
- Built an AI-powered chatbot feature giving learners on-demand, personalized assistance during lessons.
- Designed the PostgreSQL schema on Neon with an emphasis on supporting concurrent multi-user access.

OnceView — Privacy-Focused Image Sharing | *Next.js, TypeScript, Supabase (Storage + Postgres)* | *(Under construction)* GitHub

- Built a privacy-focused image-sharing app issuing one-time, token-based share links (nanoid) that expire after first view or 10 minutes.
- Identified and fixed a real access-control gap during a self-directed code review, replacing a permanent public URL with short-lived signed URLs.

Personal Portfolio | *Next.js 14, React, TypeScript, Tailwind CSS, Supabase* | Live / GitHub

- Designed and built a responsive personal portfolio with a reusable, component-based architecture styled with Tailwind CSS.
- Integrated Supabase for backend data handling and deployed on Vercel with CI/CD from GitHub, enabling automatic production updates on every push.

CONTENT CREATION

- YouTube Content Creator (3+ years) — Independently produce, film, and edit video content; grew a channel to 7.7K+ subscribers and 3M+ total views. Design thumbnails and channel branding using Canva.

LEADERSHIP & ACTIVITIES

- Community Leader (Province Level) — Led and supported all BS (CS/IT) students across Punjab Province under University of the Punjab, providing academic guidance and resource-sharing.
- Project Team Leader — Led a team through the full lifecycle of a semester project, coordinating tasks, timelines, and deliverables.
- Class Representative (CR) — Served as the elected liaison between the batch and faculty/administration.

HOBBIES & INTERESTS

Badminton, Chess, Traveling, Sketching.
