PROFESSIONAL SUMMARY

Final-year Computer Science student with 3+ years of self-directed, project-based experience building full-stack web applications in React, Next.js, and TypeScript, plus PostgreSQL, automated testing, and CI/CD. Ships complete, production-deployed features across the stack, from schema design to access control and UI implementation.

TECHNICAL SKILLS

- **Languages:** Python, C++, JavaScript (ES6+), TypeScript, SQL
- **Front-End:** React, Next.js, Tailwind CSS, HTML5/CSS3, Responsive Design
- **Back-End & Databases:** Next.js API Routes / Server Actions, RESTful API Integration, PostgreSQL (Supabase, Neon)
- **Testing & DevOps:** Automated Unit Testing (Vitest), Git, GitHub, Vercel CI/CD, Docker
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, System Design

PROJECTS

Collaborative Document Editor | *Next.js, TypeScript, Supabase (Postgres), Vitest*

- Built a Google Docs-style editor with document CRUD, rich-text editing, and automatic duplicate-name resolution, eliminating naming conflicts and accidental overwrites for users.
- Solved collaboration-reliability risk by implementing .txt/.md import, role-based sharing and access control between owned vs. shared documents, and debounced autosave to PostgreSQL that protects edits against data loss.
- Protected access-control and naming logic with automated unit tests (Vitest) to catch regressions before release; shipped to production via Vercel with GitHub CI/CD for continuous, hands-off deployment.

Momentum — Local-First Habit Tracker | *Next.js 15, React, TypeScript, Tailwind CSS, jsPDF* | Live | GitHub

- Designed a fully client-side habit-tracking PWA with no backend or login — habit, streak, and analytics data persisted in localStorage, with JSON export/import for backup and cross-device restore.
- Built streak and milestone tracking, category-based habit scheduling (daily/weekly/monthly), and analytics reporting with client-side PDF and CSV export.
- Added local-only privacy controls (device passcode lock) and PWA installability for home-screen, widget-style access.

Duolingo Clone — AI-Enhanced Language Learning App | *Next.js, TypeScript, PostgreSQL (Neon), AI API* | Live | GitHub

- Rebuilt Duolingo's core learning experience from scratch, including lesson progression, exercises, and gamified streak/XP tracking.
- Built an AI-powered chatbot feature giving learners on-demand, personalized assistance during lessons.
- Designed the PostgreSQL schema on Neon with an emphasis on supporting concurrent multi-user access.

OnceView — Privacy-Focused Image Sharing | *Next.js, TypeScript, Supabase (Storage + Postgres)* | GitHub

- Built a privacy-focused image-sharing app issuing one-time, token-based share links (nanoid) that expire after first view or 10 minutes.
- Identified and fixed a real access-control gap during a self-directed code review, replacing a permanent public URL with short-lived signed URLs.

Personal Portfolio | *Next.js 14, React, TypeScript, Tailwind CSS, Supabase* | Live | GitHub

- Designed and built a responsive personal portfolio with a reusable, component-based architecture styled with Tailwind CSS.
- Integrated Supabase for backend data handling and deployed on Vercel with CI/CD from GitHub, enabling automatic production updates on every push.

EDUCATION

University of the Punjab — Lahore, Pakistan

Bachelor of Science in Computer Science (Ongoing) — Expected Graduation: October 2027

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, Compiler Construction, Software Engineering (Agile, Scrum, Kanban), Web Technologies (HTTP/HTTPS, REST, SOAP, JSON), Discrete Mathematics, Probability & Statistics

CERTIFICATIONS

- **Google AI Essentials** — Google, via Coursera (Aug 2025) — View Credential

LEADERSHIP & ACTIVITIES

- **Community Leader (Province Level) —** Led and supported all BS (CS/IT) students across Punjab Province under University of the Punjab, providing academic guidance and resource-sharing.
- **Project Team Leader —** Led a team through the full lifecycle of a semester project, coordinating tasks, timelines, and deliverables.
